PLEASE DO <u>NOT</u> ADD TO THIS DOCUMENT UNLESS YOU ARE IN THE "MANAGING, TRACKING, AND DOCUMENTING" GROUP

Group Assignments

<u>Implementation A</u>
- Vita
- Jamie
- Alex
- Adrian
- Farbod
- Justin
- Ramin
- Prempreet
- Sornali
- Ryan
- Darren (Pending confirmation)

<u>Implementation B</u>
- Jinze
- Abdullah
- Carter
- Fares
- George
- Arian
- Taylor
- Namit
- Tung
- Nicole

<u>Bug Testing & Repair</u>
- Darren
- Ryan
- Tung
- Nicole

<u>Demonstrating</u>
- Justin
- Sornali

<u>Managing, Tracking, and Documenting</u>
- Filip
- Aaron
- Mankaran
- Saad

First Meeting - Saturday, April 1st, 8:00PM to 9:30PM
- Decided that testing responsibilities would go to implementation groups. Role of "testing" group will be mostly whole-system tests, while use-case tests will be done by those who make them.
- Everybody confirmed that they were happy with current group responsibilities. No inequities or concerns about inequities were voiced.
- After a poll, it was decided that we would use iteration 2 from Mankaran's former group.

Second Meeting - Tuesday, April 4th, 8:00PM to 9:30PM
- Decided to make a hardware sim for the demo, which will be done by the management team.
- Discussed GUI implementations - too complex to put in this document, but generally will follow a listener style implementation.
- Discussed code organization; GUI implementations will be put into com.autovend.software.gui package.
- Further refined GUI UIs.
